

Supplier Development Program

- › We seek to improve and raise the standard of our more than 2,000 suppliers in responsible management practices.
- › Since 2013, our logistics team seeks to know the reality of MSMEs in order to provide them with feedback and identify opportunities for improvement.
- › Since 2018, TASA works hand in hand with the Global Reporting Initiative (GRI) and has created the "competitive business" program:

9 suppliers are trained and develop their first sustainability report.

Thanks to the success of this program, **100 are summoned for the 2019 period.**

- › In 2019, thanks to the support of the International Labour Organization (ILO) and the Ministry of Labor (MINTRA for its Spanish acronym), more than 100 providers were trained in the SCORE methodology.
- › An important milestone of this initiative was obtaining a S / .650,000 soles fund from the Innóvate Program for 2020.
- › To date we have:

+130 suppliers publish their sustainability report.

80 suppliers develop improvement plans.

60 critical suppliers improve their management regarding the service they provide to TASA.

STAGES OF THE MiPYMES DEVELOPMENT PROGRAM

1

DIAGNOSIS

We know the current status of our suppliers, that is: labor and financial management, environmental compliance, safety and health.

2

TRAINING

We develop their technical knowledge hand in hand with our allies and with validated methodology.

3

ADVISORY

We provide advice for the development of improvement plans hand in hand with our allies and in addition, with the visits of our Logistics team, we monitor our suppliers.

OUR CHALLENGE TO 2020

Integrate the needs of the various TASA user areas.

Establish relationship with maintenance indicators.

Update supplier evaluation tools.

Implement supplier monitoring and audit system.

Develop capacities in the Logistics team (SCORE, GRI).
